  - We need to protect, maintain and safeguard our valuable resources and things.
  - Therefore, related laws are necessary to be known by every one.
  - In our curriculum, the subjects related to the environmental law have already been designed.
  - But, laws relating to cultural heritage and tourism industry have not been involved in the curriculum yet.
  - As the tourism makes support our country economy and gives some impacts on the local people.
  - Thus, if those laws are added as a subject in the LLB course, the law students will apply them effectively in the practice.
